SUMMARY

Software Engineer with hands-on experience developing full-stack applications, RESTful APIs, and backend services using Java, Spring Boot, React.js, Node.js, and MongoDB. Strong foundation in Data Structures & Algorithms, Object-Oriented Programming, and database design, with experience building scalable applications and secure systems. Passionate about solving complex engineering problems and developing reliable software solutions that deliver business impact.

EDUCATION

Manipal Institute of Technology

B.Tech. in Computer Science and Engineering (Cyber Security) | CGPA: 8.27

Manipal, India

2022 – 2026

TECHNICAL SKILLS

Programming Languages : Java, Python, C/C++, JavaScript, SQL

Frontend : React.js, HTML, CSS

Backend & APIs : Node.js, Spring Boot, RESTful APIs, JSON

Database & Tools : MongoDB, Git, Postman, Linux

Core CS : Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems

Security Tools : Burp Suite, Wireshark, Nmap, OWASP ZAP

EXPERIENCE

Intern | IIT Madras Pravartak

March 2025 – June 2025

- Processed and structured **datasets** to support **backend workflows** across multiple application modules, improving data organization and usability.
- Performed **data cleaning and validation** to ensure accuracy and consistency for application use.

Frontend Developer | IBM SkillsBuild

June 2024 – July 2024

- Integrated frontend components with **REST APIs**, ensuring efficient **data flow** and seamless **client-server communication**.

PROJECTS

Shipping Cost Calculation Microservice | Java, Spring Boot

- Developed a Spring Boot-based microservice exposing **5+ RESTful APIs** for shipping cost calculation and order processing.
- Implemented business logic for **route-based pricing using distance calculation** and warehouse selection, handling **10+ pricing scenarios**.
- Used Spring Data JPA to manage multiple entities and handled 8+ edge cases to ensure **reliable API responses for frontend integration**.

Product Management Web Application | React.js, Node.js, MongoDB

- Implemented **CRUD APIs** to manage **10+ products**, enabling efficient client-server communication.
- Organized and maintained product data in **MongoDB collections**, ensuring reliable storage and retrieval.
- Connected **10+ frontend components** with backend services to support dynamic data-driven functionality.

Web Penetration Testing Tool (CLI-Based) | Kali Linux

- Built a modular CLI-based vulnerability scanner with 6+ modules targeting SQL Injection, XSS, and API vulnerabilities.
- Implemented asynchronous TCP/UDP socket-based scanning to enable concurrent execution, increasing scanning efficiency by 40%.
- Generated structured **HTML reports** summarizing and categorizing detected 10+ vulnerabilities for easier analysis.

POSITION OF RESPONSIBILITY

Core Committee Member | Drama Club

Aug 2023 – July 2024

- Led a team of **50+ members** in the Drama Club, organizing and executing **10+ events** for **200+ participants**.
- Streamlined coordination and task management processes, improving efficiency across **50+ team members** and ensuring smooth execution of all events.
